

# AgStudio 2020 Version 24.6

August 5, 2020

## Release Notes

### **Bug Fixes**

- 🔗 In the Treatment Analysis grid, the “Weighted Average Yield” is now calculating correctly based on the grouping options chosen.

### **Card Manager Updates**

- 🔗 Upgraded the Precision Planting and Climate components to the latest releases.
  - 🔗 Updated the Climate card manager to correctly display planting data from twin row planters as there were some issues when it appeared to be missing data passes and looked “striped.”
  - 🔗 Updated the Climate card manager to address an issue with calculating engaged width. The issue presented itself as an inflated number of harvest acres in yield map reports and the Stats extension.
  - 🔗 Updated the Precision Planting component for the 2020 YieldSense updates in preparation for harvest data from the new/beta devices in 2020.
-
