Release Notes*Enhancements*

- 🔗 Enhance Waypoint Lab QR code to handle more information
- 🔗 Add test package options for A&L Great Lakes lab for Co (cobalt), Mo (molybdenum), Na (sodium) and NO₃N (nitrate).
- 🔗 Create a QR Code for Servitech Lab

Bug Fixes

- 🔗 Fixed “Save as a Layer Template” function so templates correctly save to the entire database when the “All” domain is selected.
- 🔗 Change the data type of the yield target attribute in Encirca Decision Zones layers to allow compatibility with the layer surfacer. (Field360 Only).
- 🔗 Fixed object reference error with “Edit Yield Goal” function in Encirca Decision zones layer (Field360 Only).

Card Manager Updates

- 🔗 Fixed several potential problems reading in Deere GS4 data.
 - 🔗 Fixed problem processing AgLeader Versa application data with the “ChemRate” attribute.
 - 🔗 Respect Precision Planting “calibration” factors when we detect them set in the monitor.
 - 🔗 Improved error message when we detect that a source rate unit lacks a denominator.
 - 🔗 Handle a greater variety of sensor inputs from the ADAPT card manager, affecting several monitor types.
 - 🔗 Add support for dry blends from Raven Monitors.
-
